

NEW AXWAY AND TENABLE NETWORK SECURITY OFFERINGS ON AMAZON WEB SERVICES MARKETPLACE

Outsourcing and BPO

by Claire Vanner | 13 November 2013

New Axway services embrace the API economy with highly scalable and secure API management and Tenable offers Nessus vulnerability configuration, and patch assessment solutions.

Amazon Web Services (AWS) has two new availabilities from Axway and Tenable Network Security.

[Axway](#) Enterprise API Management solution allows enterprises to leverage the power and scalability of the Axway API Gateway on AWS to manage, deliver, and secure their enterprise APIs.
